Date

hundred (100) feet or less, showing the following:

- i. north arrow, scale, and date;
 - ii. topographic contour lines, if available;
 - iii. the location of all existing and proposed buildings, structures, and other improvements, including the location of any existing or proposed subdivision and development;
 - iv. the location of all existing streets, drives, and other access ways, and
 - v. the location of any existing bodies of water or watercourses, identified floodplain areas, and, if available, information pertaining to the floodway, and the flow of water including direction and velocities.
- c). Plans of all proposed buildings, structures and other improvements, drawn at suitable scale showing the following:
- i. the proposed lowest floor elevation of any proposed building based upon North American Vertical Datum of 1988;
 - ii. the elevation of the base flood;
 - iii. supplemental information as may be necessary under 34 PA Code, the 2009 IBC or the 2009 IRC.
- d). The following data and documentation:
- i. elevation certificate;
 - ii. detailed information concerning any proposed flood proofing measures and corresponding elevations;
 - iii. if available, information concerning flood depths, pressures, velocities, impact and uplift forces and other factors associated with a base flood and Floodway area, demonstrating that the proposed project, when combined with all other existing and anticipated development, will not increase the base flood elevation at any point;
 - iv. a document, certified and sealed by a registered professional engineer or architect, which states that the proposed construction or development has been adequately designed to withstand the pressures, velocities, impact and uplift forces associated with the base flood. This statement shall include a description of the type and extent of flood proofing measures which have been incorporated into the design of the structure and/or the development;
 - v. detailed information needed to determine compliance with Section 5.C.(6), Storage, and Section 5.D, Development which may endanger Human Life of the Floodplain Regulations, including:
 - a). the amount, location and purpose of any materials or substances referred to in Section 5.C.(6) and 5.D which are intended to be used, produced, stored or otherwise maintained on site; and
 - b). a description of the safeguards incorporated into the design of the proposed structure to prevent leaks or spills of the dangerous materials or substances listed in Section 5.D during a base flood;
 - vi. the appropriate component of the Department of Environmental Protection's Planning Module for Land Development;
 - vii. where any excavation or grading is proposed, a plan meeting the requirements of the Department of Environmental Protection, to implement and maintain erosion and sedimentation control.
7. Applications for Permits shall be accompanied by a fee, established by and payable to Hulmeville Borough based upon the estimated cost of the proposed construction as determined by the Floodplain Administrator.
